

PPT SERVICES

Professional, Commercial and Industrial Cleaning Equipment

01208 78677

First of all, PPT Services would like to thank you for your continued loyalty and custom received over the years. Your satisfaction is very important to us, and we hope we have been successful in providing you with excellent customer service and quality products.

Over the past 2 years, we have absorbed endless prices rises with regard to raw materials etc. The ongoing supply chain issues triggered by Brexit and compounded by COVID-19, greater transportation costs and more recently, the unprecedented spike in energy prices, have all contributed to higher input costs from suppliers.

We have made every effort to hold your prices, as we recognise the importance of stability. However, we cannot continue to do so, as the increases experienced are so significant. A small proportion does, therefore, need to be passed on. This is necessary in order to maintain sustainable operating margins and to ensure our long-term viability.

The prices of some items & services supplied may increase by up to 10%. These changes will come into effect from 1st February 2022. Please be assured that we are not profiting from this increase, we are only passing on the additional costs.

As a valued customer, we trust that you understand that these changes are due to factors beyond our control and that we have made every effort to keep increases to a minimum. We truly appreciate your business and look forward to working with you in the future!

Whether you're cleaning a façade, floor, machine or vehicle, these hot and cold water pressure washers effortlessly, safely and effectively remove stubborn dirt and residues including dust and grease - without damage to the structure or surface
